

About NMDC Dredging & Marine

NMDC Dredging & Marine (D&M) is the specialist dredging, reclamation and marine construction services organization headquartered in Abu Dhabi with operations globally. NMDC D&M works across the energy, tourism and urban development sectors to shape marine environments globally.

Combining unrivalled expertise with the latest technology, NMDC D&M operates an extensive fleet of dredgers and support vessels, providing the capability to operate anywhere in the world, and navigate the most challenging site conditions.

Over several decades NMDC D&M has delivered many legacy projects across diverse sectors, including major island and beach developments in Abu Dhabi, and international projects in Egypt, Maldives, India and Bahrain. Its major island and beach developments in Abu Dhabi include Al Reem, Al Maryah, Yas, Saadiyat, Al Seef, and Al Raha, alongside ADNOC offshore islands and Corniche and Yas Island beaches.

NMDC Dredging & Marine is a majority-owned subsidiary of NMDC Group.

NMDC Group Mission, Vision, and Values

Our **vision** is to deliver innovative solutions shaping the future.

At NMDC Group, our **mission** is threefold:

- We leverage the talent and experience of our people and provide opportunities to build successful and rewarding careers.
- We serve our clients through delivering EPC solutions and beyond, that are environmentally conscious, safe and cost efficient.
- We generate exceptional returns for our shareholders.

Our organizational **values** unite and inspire us:

Knowledge – Accountability – Morality – Alliance – Leadership

Responsible business

At NMDC Dredging & Marine, sustainability is central to everything we do. Our approach is built around three key pillars:

- Operational optimization to increase efficiency and reduce environmental impact.
- Environmental preservation services, including projects that protect and restore marine ecosystems.
- Energy transition initiatives, driving innovation and low-carbon solutions to support the UAE's Net Zero 2050 vision.

Through cutting-edge technologies and responsible practices, we reduce emissions across dredging and marine operations while safeguarding natural resources for future generations.
